

What do experts think about us?

St Stephen's Hospital, Delhi

B medical systems

The St Stephen's hospital in Delhi was established in 1885 as a women's and children's hospital, but later became a landmark of the city's healthcare system by widening its scope of operations in 1908. The hospital has a dedicated blood bank department to cater to the different needs for blood and blood related components of the hospital and other medical organisations.

- 1. Could you explain what your activities consist of?** We are a blood bank engaged in the activity of collecting, storing, processing and transporting blood and related components. We organise donation camps at the hospital to collect blood after which we store few samples as whole blood and rest are further process to extract platelets, plasma and other blood related components.
- 2. Why is there a need of cold storage in your organization?** We require effective cold chain solutions at our lab to ensure the safety and quality of the blood and related components in our blood bank.
- 3. Which products did you buy from B Medical Systems?** We have bought a Plasma Storage Freezer F291 and two Blood Bank Refrigerators B291.
- 4. What are the features that you like the most? Could you please talk about the performances of the devices?** The technology that we find extremely useful is the fact that we can easily export data through USB. Overall, also products are reliable and user-friendly.
- 5. How are you using the B Medical Systems' product and how does it benefit your institution?** We are using these products from B Medical Systems to store blood and blood related components. These cold chain solutions help us by keeping the samples at their intended temperatures while ensuring the safety and quality for the same.
