Plasma Storage Freezers

B Medical Systems | F Range

Plasma Storage Freezers are devices intended for the safe storage of frozen blood plasma or blood components at temperatures below -27°C.

Compliant to DIN 58375 | Medical Device Class IIa according to MDD 93/42/EEC

- B Medical Systems Electronics
- B Medical Systems digital display
- B Medical Systems 7” full touchscreen display
- Safety door lock (with 2 keys) and key-operated power switch ON/OFF (with 2 keys)
- Power indicator light and digital temperature indicator (display: 0.1 digits)
- Controlled fan cooling system for constant temperature and even temperature distribution across the entire refrigerating chamber
- Automatic switch-off of the evaporator fans when the door opens
- Self-contained alarm system with integrated battery takes over the alarm function and temperature value measurements in case of system failure for at least 48 hours
- Acoustic and visual alarm signal in case of temperature alarm and system failure
- The alarm history function on the electronic stores all the relevant values during a temperature alarm, such as: min., max., average temperature and alarm duration
- Remote transmission alarm signal (via potential-free contact) in case of temperature alarm (change-over contact)
- Door opening alarm (visual / acoustic)
- Designed and tested for climatic class SN (ambient temperature range +10°C to +32°C)
- Interior made from stainless steel
- Additional remote transmission alarm signal (via potential-free contact) in case of system failure (change-over contact)
- Smooth castors for optimum flexibility of movement
- External water cooling
- Ambient temperature sensor

* "B Connected - Universal software for the monitoring of refrigeration devices, including the acquisition, recording and visualization of temperature data
* DCU (Data Communication Unit) - Hardware module monitoring all operating conditions and passing them through to a central database – via local network (in combination with "B Connected)
* Ethernet interface for the visualization of all operating and control functions (hardware and software settings) via "B Connected monitoring software on a peripheral device (computer)
Plasma Storage Freezers
B Medical Systems | F Range

7 models • Volume 121 > 895 L • Set temperature -41°C / -32°C • Climate class SN • Compliant to DIN 58375 | MOD 93/42/EEC, Class IIa

In conformity with national and international guidelines, regulations for Medical Devices offering reliability, efficiency and safety at an optimal price.

- Integrated multi-function monitoring electronics
  - Integrated B Medical Systems multi-function electronics; with easy access in the door level; offers alarms, central alarm system, set point security, battery backup, full display and many other control features; compatible with “B Connected” monitored solution for data monitoring and recording.

- Lifetime warranty corrosion-free cabinet
  - One piece material cabinet with a lifetime warranty for zero corrosion, highest quality polypropylene for better insulation and no sharp edges to provide easier maintenance and cleaning
  - Smart ergonomy - Easier and safer handling because of heavier components placed at the bottom

- High storage capacity
  - High storage per square meter in terms of net volume, with a very versatile inner volume utility due to multiple user friendly rails allowing modularity.

- Exclusive integrated electronics handle bar (Patent pending)
  - All functionalities are easily accessible:
    - Digital control with full functionalities - New B Medical Systems 7” full touchscreen display integrated at optimal level in the door handle with pre-installed connection allowing exclusive “B Connected” monitoring functionalities
    - Open/close - Heavy duty door lock mechanism

- High quality materials
  - New high quality coating, certified medical devices quality and antibacterial, high quality steel for better longevity and easy hygiene control.

- Versatile modularity
  - Excellent storage capacity and modularity - Large choice of shelves and drawers offering modularity for every need.

- Special features for easy deicing and defrosting
  - New evaporator offering better performance than market average, resulting in lesser ice formation with automatic defrost when open

Plasma Storage Freezers are devices intended for the safe storage of frozen blood plasma or blood components at temperatures below -27°C developed as a result of over 35 years of expertise in refrigeration technology.

Subject to change without prior notice. Some of the accessories shown in the pictures are optional.

SAVING LIVES THROUGH RELIABLE AND INNOVATIVE TECHNOLOGY
**Full functionalities at a glance**

**B Medical Systems | Electronics**

**PRECISION LINE** | Multifunctional electronics with digital display and easy access, in the door handle; compatible with °B Connected monitored solution.

- **Key power switch**
  
  **O** = OFF / **I** = ON
  
  - To switch the unit on, turn the key switch to position „I“. The green power LED lights up.
  - After the self-check, the temperature inside the device is displayed.

- **Digital display**
  
  During normal operation the display shows:
  
  - Left-hand side: current time and internal temperature displayed in °C (Celsius) or °F (Fahrenheit) in increments of 0.1°
  - Right-hand side: the maximum and minimum inside temperature

- **Acoustic and visual alarm signal**
  
  When an alarm occurs, the red alarm LED lights up and an acoustic signal sounds. The corresponding alarm message appears on the display alternately with the measured inside temperature. If several alarms occur simultaneously, the messages will be shown alternately.

- **Function buttons**
  
  - **UP / DOWN buttons**: navigation within the parameters and modification of their values
  - **ENTER button**: use the ENTER-key to confirm the actual selection. This applies the parameter value. The change of a parameter only becomes effective when confirmed
  - **MUTE / BACK button**: in case of an alarm, the acoustic alarm can be muted for a specified time. In Parameter-mode the same key acts a "BACK-button" to go one step back

- **USB-port**
  
  A USB port is available for data export only. Measured values of the display sensor are stored for at least 30 days (ring buffer) together with a time stamp.
**PREMIUM LINE** | Multi-function electronics with 7” full touchscreen display, integrated at optimal level in the door handle with pre-installed connection allowing exclusive “B Connected monitoring functionalities.

- **Power switch**
  - To switch on press the ON/OFF button for 1 second. The green LED will light up.
  - Switch off protected by password. The door will automatically unlock before powering down.

- **Touchscreen 7” full display**
  - During normal operation the display shows:
    - At the top: current voltage, current time, defrosting, gasket heater and login status (user level).
    - Left-hand side: temperature of the regulation sensor (displaying this temperature can be disabled through the settings) and internal temperature displayed in °C (Celsius) or °F (Fahrenheit) in increments of 0.1°.
    - Right-hand side: touch buttons to access door unlock, clean, menu, alarm mute and message functions.

- **Acoustic and visual alarm signal**
  - When an alarm occurs, the red alarm LED lights up and an acoustic signal sounds. The corresponding alarm message appears on the display together with the measured inside temperature. If several alarms occur simultaneously, the messages will be shown alternately.

- **Keycard reader**
  - Login / Unlock using a NFC card.

- **Touch buttons**
  - **DOOR UNLOCK button**: unlocks the door of the device.
  - **CLEAN button**: the cleaning button allows the user to disable the touch capability of the screen for a short period of time in order to clean the screen. This button is replaced by the logout button when any user is logged in.
  - **MENU button**: allows access to the menu screen.
  - **ALARM MUTE button**: deactivates the acoustic alarm for a predefined period of time.
  - **MESSAGE button**: during a warning or alarm situation, the color of this button and the corresponding level will change. Information on an active alarm and warning is accessible by pressing the message button.

Universal software for the monitoring of refrigeration devices, including the acquisition, recording and visualization of temperature data.

- Unique monitoring software for the full range of Blood Management Solutions and Medical Refrigeration products
- Web-based interfaces for computers and mobile devices
- Modern design for simple and intuitive use
- Graphic display of temperature curves
- Integrated event and activity history of appliances' components
- Data recording on centralized database for long-term archiving
- Easy setting of specific alarm forwarding, via email or SMS
- Generation of reports compiling crucial data and activities
- Temperature and detailed device data export for third-party software
- Important price advantage compared to a traditional circular chart recorder and its spare parts
- REST API to access raw data directly from the database in read only mode

**KEY BENEFITS:**

- Unique interface for the monitoring of the full range of refrigeration devices
- Centralized database providing data access to entire customer network

---

**B CONNECTED | MONITORING SOFTWARE**

**OPTIMUM CONTROL AND PROTECTION**

- Password login
- Access right
- Optimised design for mobile and touch compatible devices
- Support of multiple languages
- Real time data: Current temperatures, set point, upper and lower limit, door state, compressor runtime
- Log data: Events, alarms within date/time, event type, description of the event.
- Event and alarm confirmation function
- Batch management: Read in of plasma bags with a barcode scanner
- Movement state and door control of Agitator devices
- Parameter settings of each device: Factory settings, real time clock, language, firmware version, RS485 address, IP address
- Parameters of the alarm profile (day, hour, minute)
- Alarm management

---

For optimum control and protection of your preparations.

°B Connected & DCU offer a highly flexible system that is adaptable to specific customer requirements

> Complete & legally safe documentation of temperature data
> Comprehensive applications and diagnostic possibilities

Hardware module monitoring all operating conditions and passing them through to a central database – via local network.

- Interface connection of °B Medical Systems appliances to an existing network
- Graphical user interface displaying temperature and configuring devices and alarms easily
- Direct connection to Ethernet and serial bus RS485
- Digital in/out (programmable and customer-specific use)
- Recording and storing appliance relevant data
- Integrated USB port allowing to export stored data
- The DCU combined with the °B Connected software replaces the paper temperature recorder
- All data are recorded and save in the internal storage of the DCU and backed up in °B Connected data base if connected
- Several additional self-sufficient temperature sensors (up to 4 PT1000) may be connected
- Humidity sensor input (4-20 mA)

**KEY BENEFITS:**

- Central system collecting relevant temperature data of the appliances and their respective operating conditions
- A number of connection facilities allowing flexible upgrades for individual projects

Subject to change without prior notice.
B Medical Systems (formerly Dometic Medical Systems) has more than 35 years’ experience in the medical refrigeration sector. The company, formerly known as Electrolux Medical Systems, was founded in 1979 when the World Health Organization approached Electrolux in Vianden, Luxembourg, to create a solution for the safe storage and transport of vaccines around the world. In 2001, Electrolux Medical Systems became part of the Dometic Group, and was renamed Dometic Medical Systems. Having established a legitimate reputation in the medical equipment industry, the company has also become a global leader in vaccine cold chain.

SAVING LIVES THROUGH RELIABLE AND INNOVATIVE TECHNOLOGY

B Medical Systems has been committed to the UN Global Compact corporate responsibility initiative and its principles in the areas of human rights, labour, the environment and anti-corruption.

After Sales support and service

We strive to provide you with the highest standards of service; not only through our selected distributors and partners for all your maintenance and service but also our second line trouble shooting and after sales service. This Factory based group of engineers is there to help our partners and yourself to get the best solution for your cold storage needs.
