B Medical Systems is a leading manufacturer of medical devices with 40 years of industry experience in vaccine cold chain. Our solutions can help you strengthen your national cold chain, by safely storing and transporting medicines and blood to the remotest regions.

**Partnering in your fight against Coronavirus**

B Medical Systems offers a wide range of solutions tailored to meet specific needs, ensuring reliable and innovative technology to save lives.

- **Blood Refrigerators (+4°C)**
- **Laboratory Freezers**
  - (+48°C to +80°C)
- **Solar Vaccine Refrigerators/Freezers**
  - (+4°C to -20°C)
- **ILR Vaccine Refrigerators/Freezers**
  - (+4°C to -20°C)
- **Transport Boxes**
  - (-32°C to +37°C)
- **Remote Temperature Monitoring**

- **70+ Models**
- **PQS Certified**
- **CEOP Accredited**
- **10 Years Warranty**
- **Lowest TCO**

**Reliability**
- Optimal temperature control
- Audio-visual alarm systems with remote transmission
- Advance remote monitoring
- Lowest Total Cost of Ownership
- High-quality materials
- Low vaccine spoilage

**Compliance**
- Certified medical devices Class II (a) and I acc. to MDD 93/42/EEC and FDA 21 CFR
- PQS-certified and CEOP-eligible
- Temperature reporting compliant with FDA 21 CFR Part 11
- Natural gas refrigerant conform to EU F-gas & SNAP regulations
- Compliance with USP <800> requirements and CDC guidelines

**Choice**
- Solar-powered vaccine equipment
- Multiple volumes & storage temperatures
- Unique combo models
- Access control with badge or password
- Touchscreen display with all functionalities
- Adjustable alarm limits
- Customizable interior storage options

**Rapid deployment of all products**

**Global and diversified supply chain ensuring sourcing continuity**

**Installation services in 130+ countries**

**State-of-the-art manufacturing technology ensuring minimal production lead-time**

Through our history, we have supported ministries of health across the world. Reach out to our regional managers for more information:
